

\$\$\$\$\$ TO MAKE YOUR HOME LEAD-SAFE!

Do you live in an old home and have old windows or peeling paint? If so, we can help!

You qualify for help if meet ALL the following:

- ❖ You have a child under 6 years old or pregnant female **LIVING IN** the home
- ❖ You are a low-moderate income family
- ❖ You live in a home built before 1978
- ❖ You live in the county of Calhoun, Ingham, Kalamazoo, Muskegon, Oakland, Saginaw (excluding city of Saginaw) or the city of Detroit **OR** elsewhere if your child has an elevated blood lead level (10 or above)
- ❖ You own or rent the home

What is included?

- ❖ Free Lead Inspection/Risk Assessment (\$750 value) and report of findings
- ❖ Lead Hazard Control work which **may** include **new windows** and **doors** and special cleaning and painting.

What is the cost?

- ❖ **Owner Occupied** – Almost FREE! A small fee is required depending on income.
- ❖ **Landlords**- We provide from \$2,000-\$8,000 per unit; Landlords must come up with the rest. We will also provide assistance in applying for a low-interest loan for lead hazard control.
- ❖ **Tenants**- There is no cost to you. We need your landlord's permission before starting work.

Getting Started is Easy!

Just fill out the attached application, remembering to provide proof of income as instructed on the form.

Then send the form and proof of income to us at:

**MICHIGAN'S LEAD SAFE HOME PROGRAM
IS YOUR HOME SAFE FOR CHILDREN?**

The Lead Safe Home Program at the Michigan Department of Community Health offers assistance to low and moderate- income families, as well as Rental Property Owners, in making their homes lead-safe for children. The Program has made over 1600 homes lead-safe since March, 1998. Hundreds of young children now live in housing made lead safe through our program.

****Children are at risk of getting lead poisoning if they live in a house or visit a home/daycare built before 1978 that has paint that is chipping, peeling, cracking or chalking.**

****Lead in paint, house dust and soil hurts a child's health and can cause behavior problems such as learning disabilities, hyperactivity and poor hearing.**

****Most children do not show signs of being sick from lead. The only way to find out if your child has lead poisoning is through a blood test. Call your child's doctor or clinic to have the test done.**

You may qualify for this program whether you own or rent. To qualify, the unit must meet ALL of the following:

- **Occupant income (gross) must be low or moderate. Rental Properties are based on tenant income.**
- **Your home or apartment must be built prior to 1978.**
- **Your home must contain at least one bedroom.**
- **The property taxes on your home must be paid up-to-date. If applicable, rental properties must have valid rental certificate and no code violations.**
- **There must be a child under 6 years of age OR a pregnant female LIVING IN the home**
- **You must contribute on the project in some way, either money or labor. This contribution may also come from other local programs in your area (housing agency, church, etc).**
- **Your home is within a designated target area. These target areas include homes located in Calhoun, Ingham, Kalamazoo, Muskegon, Saginaw (excluding city of Saginaw), Oakland counties or the city of Detroit, OR a child/children under 6 years of age with an Elevated Blood Lead (EBL) level of 10ug/dL or higher occupies the home or visits on a regular basis in areas outside of these counties.**

Please note that in some target areas, it may be necessary that you first apply to the local lead program covering your area.

In addition, **priority** will be given to families meeting the following criteria:

- Your home was built prior to 1940.
- Your child or a visiting child has an elevated blood lead level
- Your home is used as an in-home daycare.
- Your home is occupied by a pregnant woman.

The following commitments must be made by the household:

- Allow field staff into your home to inspect for lead before and after the project
- Children under 6 years old must have blood tests for lead before and 6 months after the project.
- Most likely, the family must move out of the home during project construction.
- Must be willing to contribute to the project in some way, either money or labor. This contribution may also come from other local programs in your area (housing agency, community action agency, church, etc).

In return, you'll receive an average of \$2,000 to \$8,000 in work on your home, including items such as new windows, doors, painting and cleaning. Since each home is different, this depends on the size and condition of your home, as well as the location where lead-based paint is found. At the end of the work, you'll have peace of mind, that your home is now safe for young children!

How does the Lead Safe Home Program work?

1. Complete an application, **making sure to include proof of income (Includes, but is not limited to 3 most recent pay stubs or last year's W2s, federal or state tax returns, alimony, disability, and/or Department of Human Services statements).**
2. **Funding is provided as follows:**
Owner Occupied: Grant funds will be provided towards lead hazard control. The homeowner is expected to contribute up to \$300 depending on income. However, other sources of funding will be explored to match to our funds (ie, funds from city or community, MSHDA loan funds, housing agency, churches).
Rental Properties: Grant funds will be provided to from \$2,000 to \$8,000 PER UNIT, dependent upon certain criteria of your property. The remaining costs must be paid by the rental property owner. If the total project cost does not exceed the grant amount that we are providing, rental property owners are asked to contribute a \$300 copay per unit.
2. Program field staff will contact you to visit the home to conduct an initial site visit and to determine if the home meets basic housing code standards.
3. If approved for the Lead Safe Home Program, a field staff will come back to your home and do a full lead inspection/risk assessment at **no cost** to find areas that are hazardous to young children.
4. Based on this inspection, the field staff will write a list detailing what needs to be fixed to make the home lead-safe.
5. The field staff will bid and contract with a state-certified lead abatement contractor to perform the work.
6. The hazard reduction work typically takes 3-10 days to complete. You will be required to relocate from the house, at your own expense, during construction.

Call toll-free (866) 691-LEAD (5323) for an application and additional information .
